CROSSPAULIN™

A product of PANKAJ®

CROSSPAULIN – The Next-Gen Cross-Laminated Multilayer Tarpaulin

Crosspaulin is engineered with advanced **cross-lamination technology**, delivering unmatched **strength, flexibility, and 100% waterproof protection** in a lightweight sheet. Built with **UV-stabilized multilayer films**, it resists tearing, punctures, and harsh weather far longer than ordinary tarpaulins.

Key Features

- **Unbreakable Strength** – Multilayer cross-lamination gives 5x higher tensile strength than woven tarps.
- **All-Weather Shield** – 100% waterproof, UV-resistant, and durable in sun, rain, wind, and snow.
- **Lightweight & Flexible** – Easy to fold, carry, and reuse without cracking.
- **Long Life Protection** – Designed for multi-year use in outdoor conditions.
- **Eco-Safe** – 100% recyclable, non-toxic material, safe for crops and storage.

Benefits

- Protects harvests, goods, and equipment without leaks or damage.
- Reduces replacement costs with longer life and stronger performance.
- Saves time with easy handling and quick coverage.

What Makes Crosspaulin Different

Unlike generic tarps, Crosspaulin is not just a sheet but a **multi-layer engineered film** that combines **lightness with extreme toughness**. While others stop at "waterproof and UV-stabilized," Crosspaulin highlights **eco-safety, cost-efficiency, and long-term reliability**—making it the smarter choice for farmers, industries, and transporters who want more than just temporary cover.
